

# Notice of Project Scoping Meeting

## The City of Sunnyvale invites you to a public scoping meeting for the Sunnyvale Water Pollution Control Plant Master Plan.

**WHY THIS NOTICE:** The City of Sunnyvale Public Works Department (City) has released a Notice of Preparation (NOP) of a Program Environmental Impact Report (PEIR) for the Sunnyvale Water Pollution Control Plant (WPCP) Master Plan for public review and comment. The PEIR will evaluate the environmental effects of approval of the Master Plan, which will serve as a long-term guide for upgrading and replacing the WPCP's facilities and operations. The public is invited to a scoping meeting to provide input on the environmental review process.

**WHAT'S BEING PLANNED:** The purpose of the Sunnyvale Water Pollution Control Plant Master Plan is to ensure that the WPCP can meet changing regulations, treat existing and projected wastewater flows reliably and cost-effectively, and increase recycled water production. As a variation of the Master Plan the City is considering implementation of Water Purification Facilities in partnership with the Santa Clara Valley Water District to produce purified water at the WPCP for groundwater recharge at locations south of the WPCP. The Master Plan would be implemented at and near the WPCP, 1444 Borregas Avenue, Sunnyvale, CA. The Water Purification Facilities could involve use of existing and development of new facilities at sites in the cities of Sunnyvale, Saratoga, San Jose, and Campbell, and unincorporated Santa Clara County (Los Gatos).
